

FADAL TRAINING OFFERED BY VMC TECHNOLOGIES

FADAL OPERATOR TRAINING ---1 DAY

TEXT:

The instructor provides an Operator Training Manual.

DESCRIPTION:

Attendees will be instructed in basic machine operations, including power-on, setting up tools & offsets, and editing a sample program. All operations are demonstrated on a Fadal VMC at your location. All trainees should have an opportunity for hands on instruction.

GOALS:

Learn how to complete a set up, insert and debug a program, then run a part on the Fadal.

PREREQUISITE:

Trainee must possess the ability to read a simple blueprint and do simple shop math.
